-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 2 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear whether there are two light receivers in the claim or just the claimed first light receiver? Applicant has claimed “a first light receiver” for the first light projector but has just claimed “a light receiver” for receiving the light from the second light projector. Examiner is unsure whether the “light receiver” for the second light from the second light projector is the same as the “first light receiver” or if it is a totally different light receiver all together. Applicant is asked to please clarify.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 rejected under 35 U.S.C. 102(b) as being anticipated by Eigenstetter et al. (DE 19514718 A1, hereinafter Eigenstetter).

Claim 1

Eigenstetter discloses an inspection device comprising a light projector 5 that irradiates a parallel light made incident along the measuring points on a curved surface, and a light receiver 8 that receives the parallel light that passes the measuring points and obtains the position of the measuring points based on the receiving position of the parallel lights. It is the position of the Office that the height variations 2 that the device of Eigenstetter detects are positional data that are attributed to the height differential from the ideal height and are determined by the light received by detector 8 (abstract, Fig. 1).

Allowable Subject Matter

1. Claims 2-3 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 2, the prior art fails to disclose or make obvious “a second light projector that irradiates a third parallel light that passes a third measuring point set up on the outer diameter side of the inner surface of the flange, and a fourth parallel light that passes a fourth measuring point set up on the outer diameter side of the inner surface of the flange so that the third measuring point and the position in the circumferential direction of each flange may be the same position” and in combination with the other recited limitations of claim 2. Claim 3 is allowed by virtue of dependency on the allowed claim 2.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
